The **Count** down started

Continuous innovation and consistent performance is the key to trace the history of Texcoms Worldwide.

Started by a team of technocrats serving the textile industry, **TEXCOMS WORLDWIDE** is today a fully integrated consulting, technology services and outsourcing company with a clientele comprising leading national and international companies across the world. Its purpose of association is to help optimize growth and production for clients in the world textile marketplace.

Principles that **Count**

TEXCOMS WORLDWIDE endeavours to empower players in the textile industry by bridging various links in the value chain to optimize profitability. It aims to deliver transparent and professional service quality while ensuring the highest levels of confidentiality when working on client assignments. It also purports to ensure sustainable and consistent operational efficiencies achieved at optimal costs and in the process, raises standards of client companies to new age industry norms.

Why **Count** on us

TEXCOMS WORLDWIDE has a reputation of consistent performance and transparency of work procedure, that has helped them attain a strong foothold in markets across the globe.

It is known for its competence at providing a comprehensive, vital and value-appropriate information to clients, which enables vertical and horizontal industry coordination that leads to business growth.

TEXCOMS WORLDWIDE is driven by a team of professionals, with each one having more than 25 years of experience in the textile industry.

Its strategy is to deliver optimum return on investments that continuously strives to exceed customer expectations.

The vast experience of working across the globe coupled with its in-depth technical and management expertise, gives TEXCOMS WORLDWIDE an invincible edge.

How we make it

Count

We enable our clients to see the true potential of their operations and ensure they realize it. Our experts are present with our clients at every step of their organization's journey through implementation and help them identify new opportunities to pursue them successfully.

We are unique in many ways, from our international, highly educated and experienced staff to our approach toward problem solving. The textile industry is cyclical and structural changes can affect it. We spot the trends early on and help our clients navigate through tough times; sustain and excel.

We offer a wide range of services and solutions to organizations in the textile industry. Our core competence lies in our ability to help businesses maximize revenue, generate growth and develop sustainable, competitive advantage through our individualized solutions.

TRADING - Textile Machines

The expertise gained over the years enables us to source and offer machines customized to the specific needs of our customer. The machines are chosen after understanding the unique situations of the individual customer. The machines are then inspected, dismantled, packed, shipped, installed and commissioned. The complete package earned us the nickname, suppliers of "experienced machines".

- **Inventories at right locations**

A wide range of inventory available at our conveniently located warehouses offer customers a choice to select the right machines.

The warehouses are secure, insured and equipped to handle the extensive inventories of machinery and spares.

- **Sourcing of right textile equipments**

Purchase and sale of used textile equipments (called experienced machines). Our machines come with the knowledge, experience and expertise of the whole team.

- **Dismantling and Packing**

Dismantling experienced machinery in a proper manner and re-packing them like new machines have helped spark a new trend in the industry and aided us with branding our team and the company as a whole.

- **Logistics**

It's our strong and defined logistics network that helps TEXCOMS WORLDWIDE achieve large turnkey projects at a quick turnaround time.

SPINNING

Ring spinning plant machinery

- Complete range of machines from Blow room machines to winding machines

Open End Spinning plant machinery

- Complete range of machines from Blow room to Open End machines

WEAVING MACHINERY

With highly dedicated network in the weaving textiles sector, we expertise in serving our worldwide clients with various products that fulfil their requirements suitably.

● All kind of Dobby, Jacquard and Terry Looms

- Airjet Looms
- Waterjet Looms
- Projectile Looms
- Rapier Looms

● All kind of weaving preparatory ,machines for Cotton and Filament

- Direct warping
- Sectional warping
- Sizing

DYEING & FINISHING MACHINERY

- Texcoms Processing Department is headed by Industry professionals with over 20 years of experience in the field
- Bringing to the table in-depth knowledge of all processing Procedures. Yarn Dyeing, Knitted and Woven Dyeing, Printing and Finishing as well as full and comprehensive coverage of Indigo production line
- Capable of managing complete projects. In addition to provide the machinery we also find various solutions for many complex matters for our customers in all spectrum of processing industry
- Dedicated to providing the industry with the most economical yet cost effective methods and equipment for the Production

TRADING - Fibre, Yarn & Fabric

- **Fibre**

- **Rayon Fibre**

- We represent rayon fibre “Fulida” from China for the supply of the best quality, cost-effective rayon fibre available today.

- **Cotton**

- We also represent a leading Indian cotton supplier from Gujarat, Patidar Exports, and offer high quality Indian cotton, Sankar-6.

- **Yarn and Fabric**

The production and consumption locations are different and far away, at times. The producer hardly knows what the customer needs, similar to the customers, who are not aware of the better products available at different locations. Textile demand is seasonal and extremely cyclical, and products often tend to pile up at the producer’s end.

Our marketing experts manage demand for your product by creating awareness among the right customers, whose needs can be met by your product. We choose and offer an extensive range of yarn and fabric to customers across the globe. The yarn and fabric production is monitored and quality-assured by our in-house quality experts. The right products at the right price meeting customer needs are sourced and delivered.

SERVICES - Textile Machines and Operation Management

- **Textile Plant Valuation**

- The effective and transparent process of valuing plants aid our clients, individual customers, financial institutions and insurance companies to achieve their targets.

- **Textile Machines Commissioning**

- An expert team of professional engineers install and commission the machines at record time and at the best cost.

- **Textile Plant Electronics Management**

- We offer complete maintenance and management of electronic systems. State-of-the-art electronic labs in Indonesia and Bangladesh help in servicing and repairing electronic items cost-effectively.

SOLUTIONS - Restructuring and Rehabilitation Programs

- **Project Planning and Implementation**

Textile plants are capital-intensive. Meticulous planning, execution and on-time completion of the project avoids cost overruns. Planning projects in different countries offers benefits as well as challenges. Our project planning experts implement the project in a meticulous manner. We help you choose a right location for the plant, understanding your needs and maximizing benefits.

- **Managing Operations**

Managing textile operations effectively involves a complete understanding of the value chain. The complex textile operations involve excellent coordination among various teams, namely, finance, marketing, human resources, procurement and production. Failing to manage any one of these functions effectively can cost the company. Our techno-commercial specialists manage the entire spectrum of operations and achieve desired results.

Rieter Ring Frames of year 1982 are running at 19,000 rpm in a plant at Ahmedabad, India, operated by our management consultancy division.

- **Relocating Operations**

The Industrial Revolution in UK during 1800's started with establishing textile operations following the invention of the steam engine. Since then textile operations have shifted to various locations in Europe, America and Asia.

Labor, power, capital availability and the climatic condition of a region influences the location of textile businesses. Our global presence and firsthand knowledge can help you find the right location to establish your business. We aid you right from disbanding and shifting the machinery through to assembling and operating the venture successfully.

- **Financial Restructuring**

Textile operations are capital-intensive and involve obtaining major part of the investment from financial institutions in the form of debt capital. Businesses caught in the downward cycle may face a hard task of meeting its financial obligation. Our financial experts help promising companies sail smoothly to reap benefits during tough times.

- **Restructuring and managing sick units for financial institutions**

Financial institutions saddled with non-performing assets will have to dispose assets at throwaway price or accept the loss. Our operational, financial and marketing experts aid you in reviving the operations to full potential. The revived operations can later be sold to eligible buyers to recover all the investments.

- **Restructuring state-owned enterprises**

State-owned enterprises requiring substantial support from exchequer are a constant source of burden. Our experts help you to revive and manage the operations on behalf of the state, or investments can be recovered by partly or fully privatizing the business to suitable investors.

- **Developing a new product**

Changes in textile fashion are constant. Companies should be prepared to produce goods which are in current demand. Failure to change and adopt can leave the company behind.

Our global presence helps us understand the current trend and aids companies to produce and benefit from developing new products.

The **Count** so far

- Professional team comprising senior management executives, associates and specialized engineers from around the globe contributing to the group turnover of USD 32 million
- Liquidated and relocated 3 million spindles, 1400 looms, 12 sets of complete range of Dyeing Finishing machines, spanning different countries, such as USA, Mexico, Canada, Germany, Greece, Italy, Switzerland, Poland, Belgium, Spain, China, India, Indonesia, Pakistan, Thailand, Sri Lanka and Bangladesh
